Description

LV1 is a single gang non-metallic bracket designed for installations on existing construction. The LV1 is used for communications, cable TV or computer wire management. The LV1 adjusts to fit 0.25 in. to 1 in. wall board, paneling or drywall. LV1 bracket can be used as template for installation cutout. Specially designed wing flips up when mounting screw is tightened for a secure mount. LV1 is listed for use with category 5 or 6 cable. LV1 is designed to install Low-Voltage class 2 only.
